Dean Hyslop is Professor of Econometrics at Victoria University of Wellington, New Zealand. He is also a Senior Research Associate at Motu Research Trust, and an Associate of the Centre for Labour, Employment and Work. He has previously held positions at UCLA, the NZ Treasury, Department of Labour and the Reserve Bank, and visiting research positions at UC Berkeley and the University of Melbourne. Professor Hyslop was the co-recipient of the Econometric Society’s 2008 Frisch medal, given biennially to an applied paper published in Econometrica in the previous 5 years. His research interests lie in labour economics and applied econometrics, and his current research focuses on the effect of changes in the composition of employment on wages and productivity over the business cycle, minimum wages, individual and family earnings dynamics, and income and economic inequality.
